

# SPOKANE RIVER WORKSHOPS

**FREE!**

**3 SESSIONS TO CHOOSE FROM, FIND ONE NEAR YOU!**

**Spokane Falls**

*Photo courtesy of John Osborn*

**W**hat's new with the Spokane River? Sewage treatment plants, dams, toxic metals, low flows during summer months, threats to red band trout! With lots of problems the River needs good solutions.

**T**here is good news for the Spokane River. Public awareness is growing, but more education and action is needed. Above all else, citizens who care about the River must tell public officials that they expect state and local governments to protect and restore the River.

**A**ttend one of our workshops and you will learn about new events that impact the Spokane River and what you can do to be a good steward of our region's most visible and precious resource: the Spokane River.

**Please join us for one of our Spokane River Workshops!**

Monday November 17	6:30-8:30pm	Lakeside Middle School - Auditorium 6169 Highway #291, Nine Mile Falls, WA
