For the purposes of this polling and symposium, what do you consider your strongest affiliation to be?

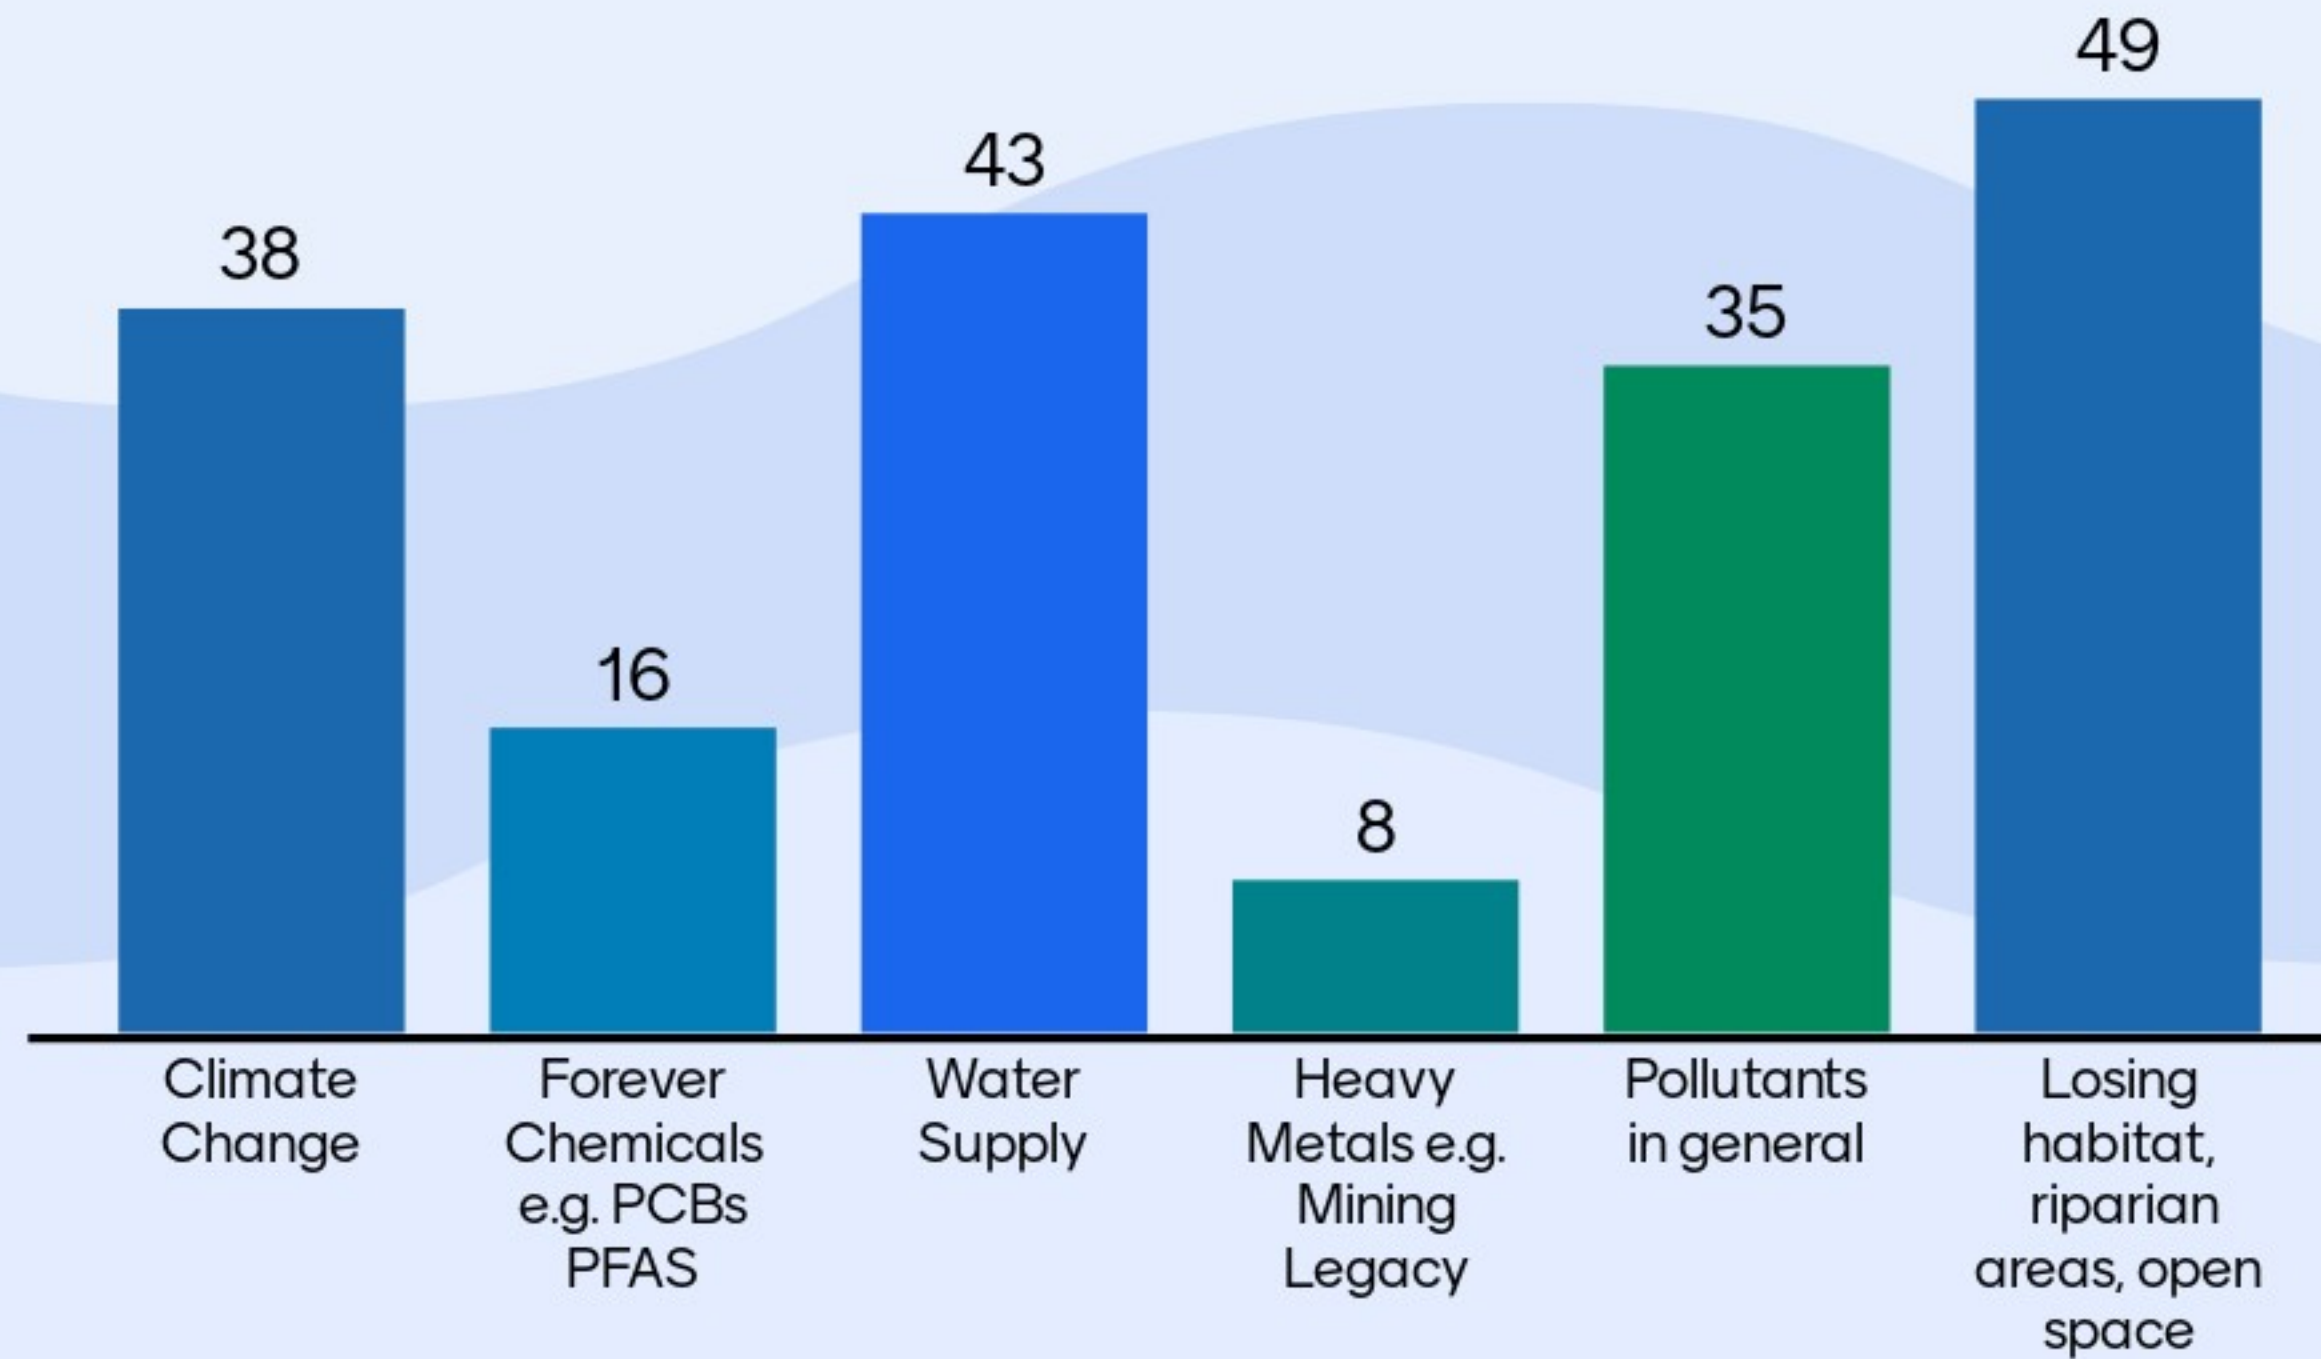

# What type of knowledge do you most draw on to make environmental decisions?

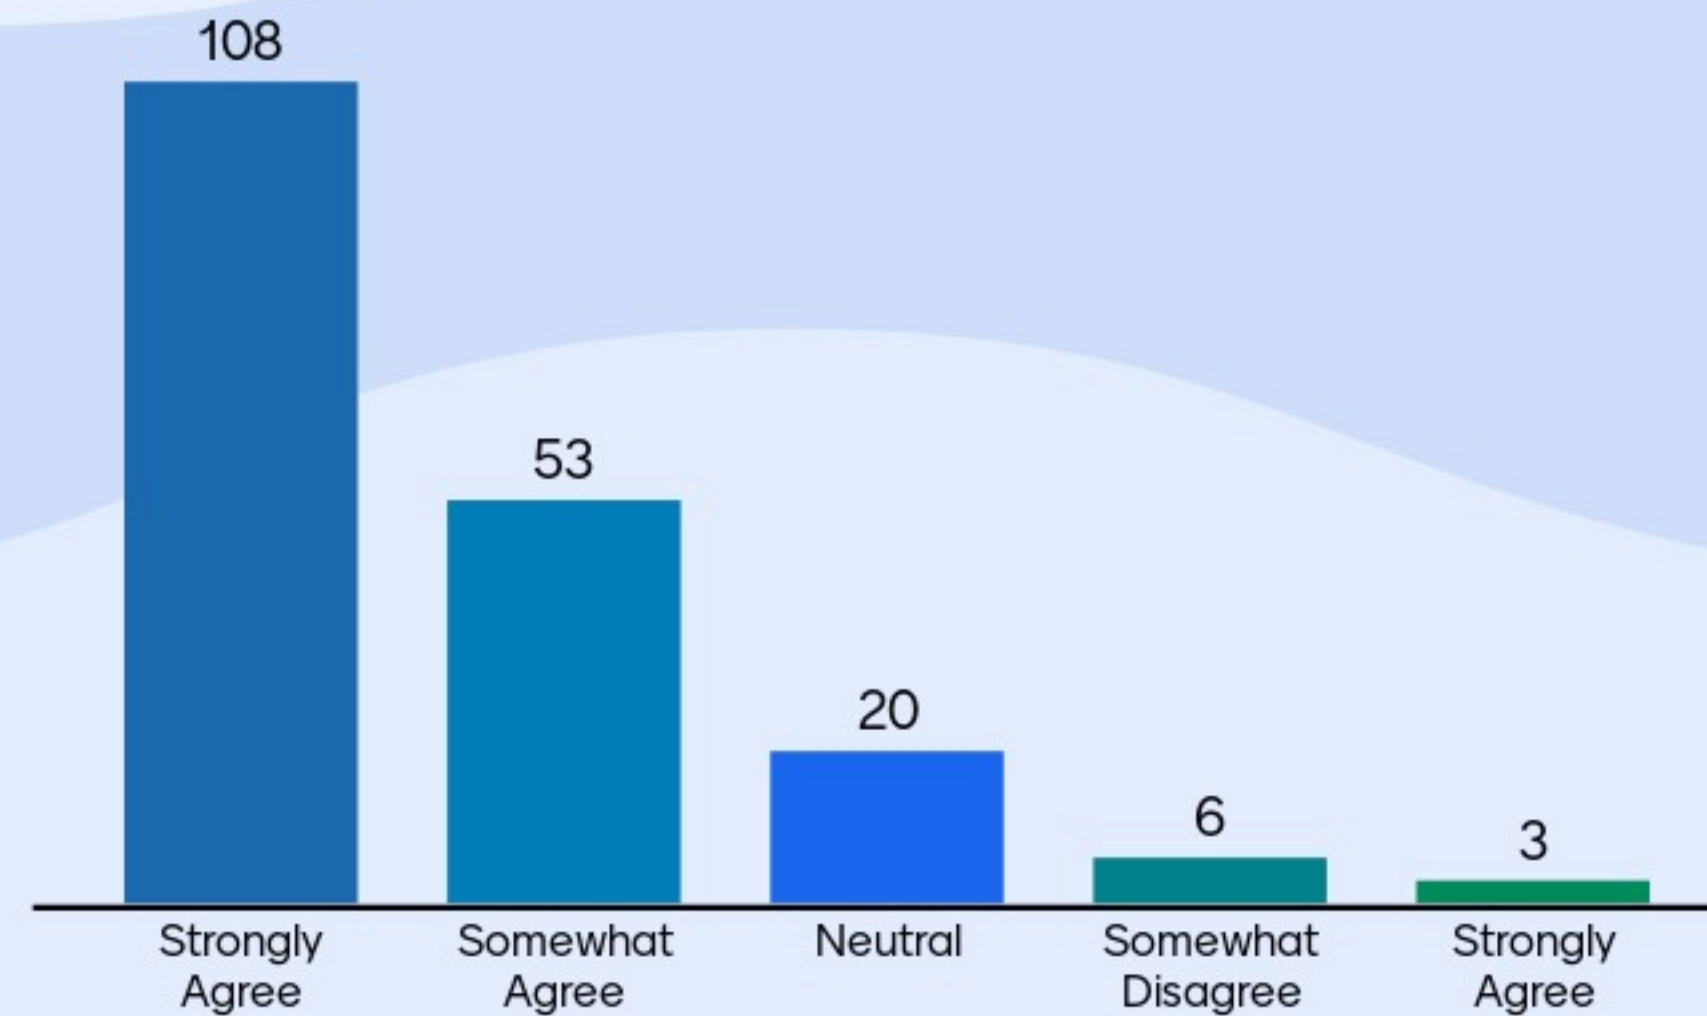

# Which do you consider the greatest long-term threat to the Spokane River Watershed?

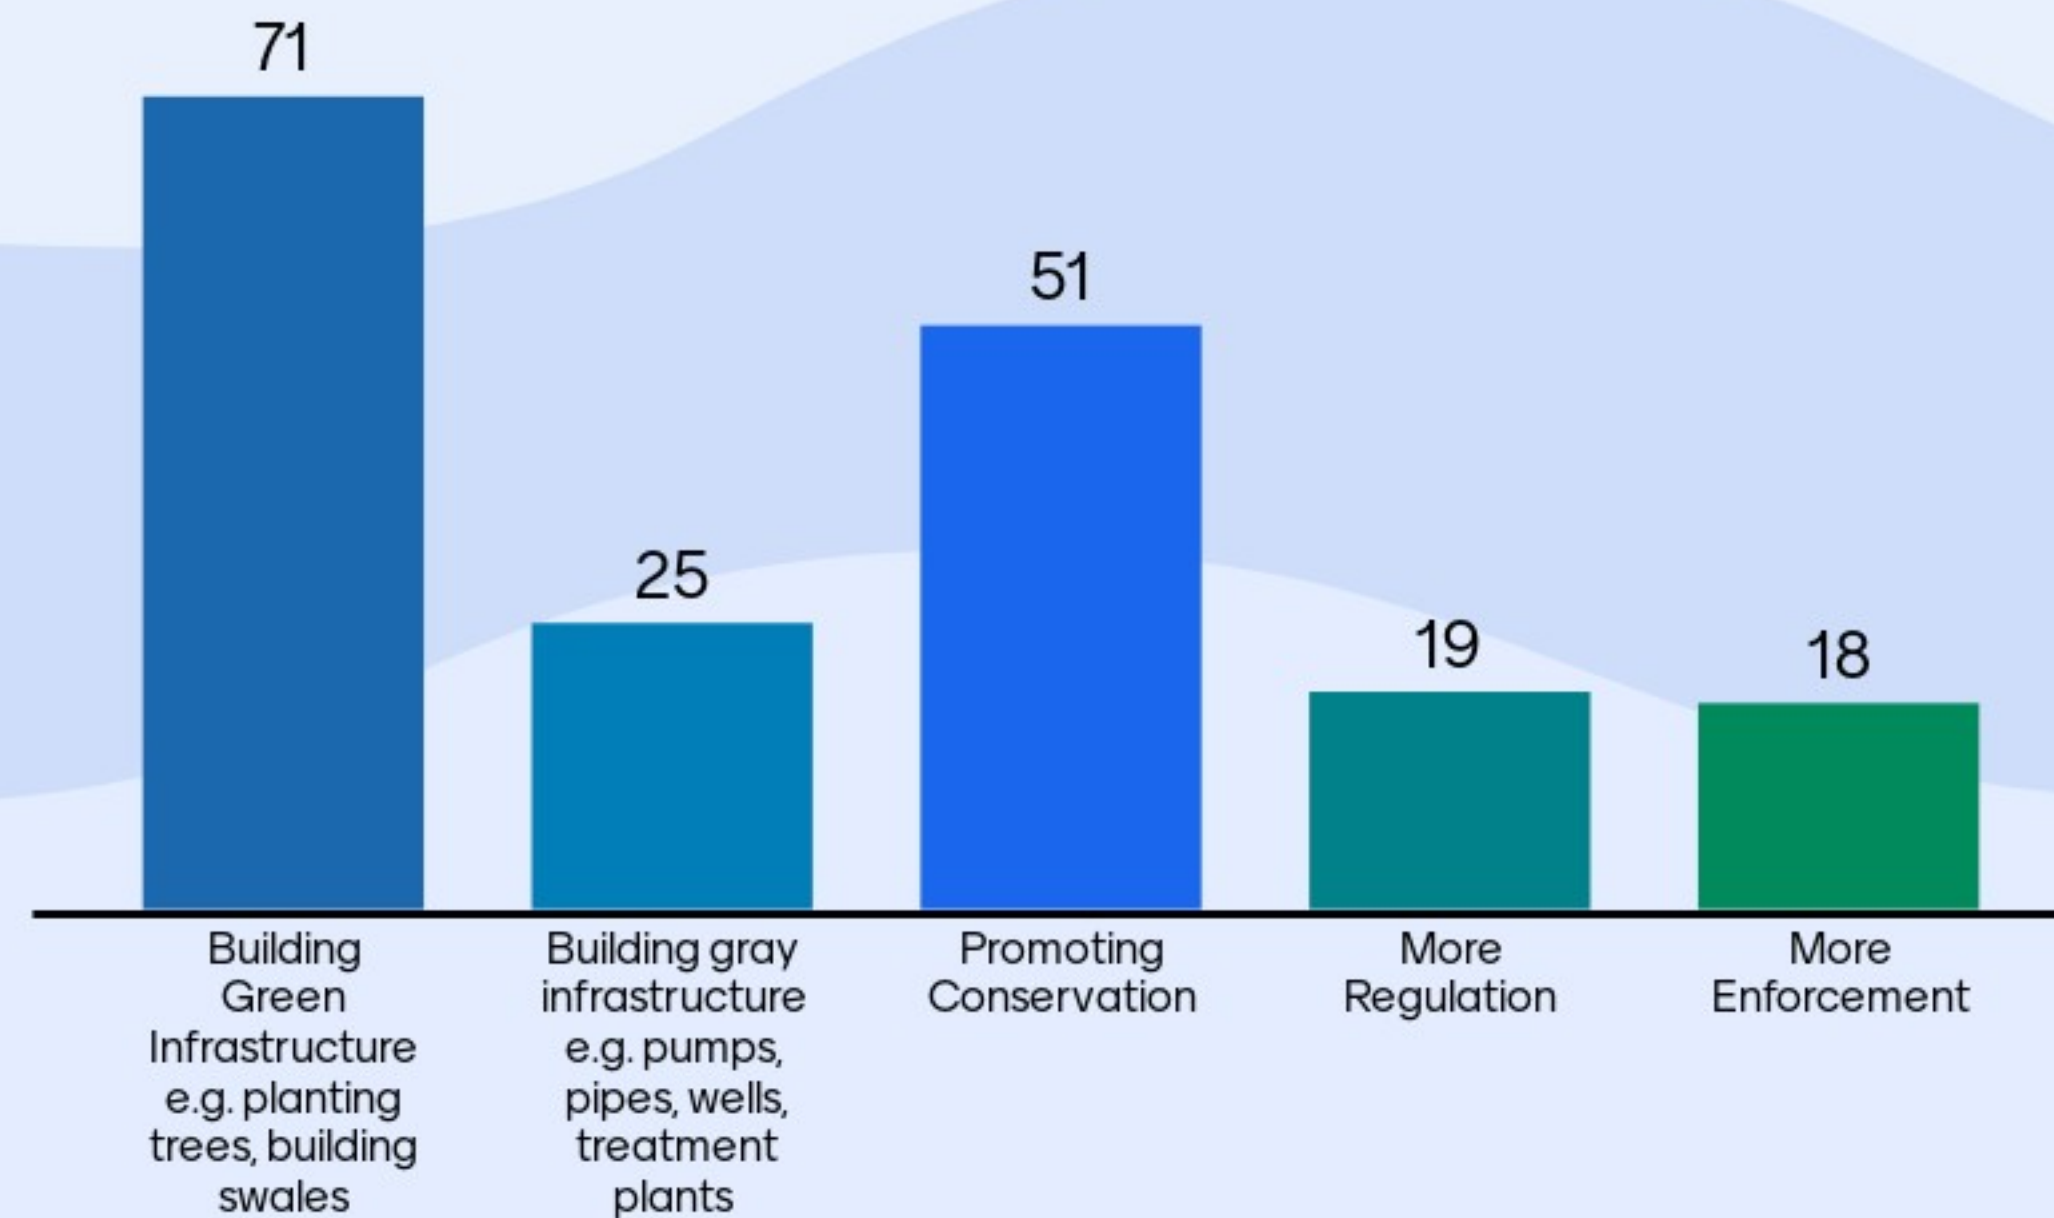

Climate Change will require major infrastructure investments to build resiliency for water supply/quality, fishery, habitat and species preservation.

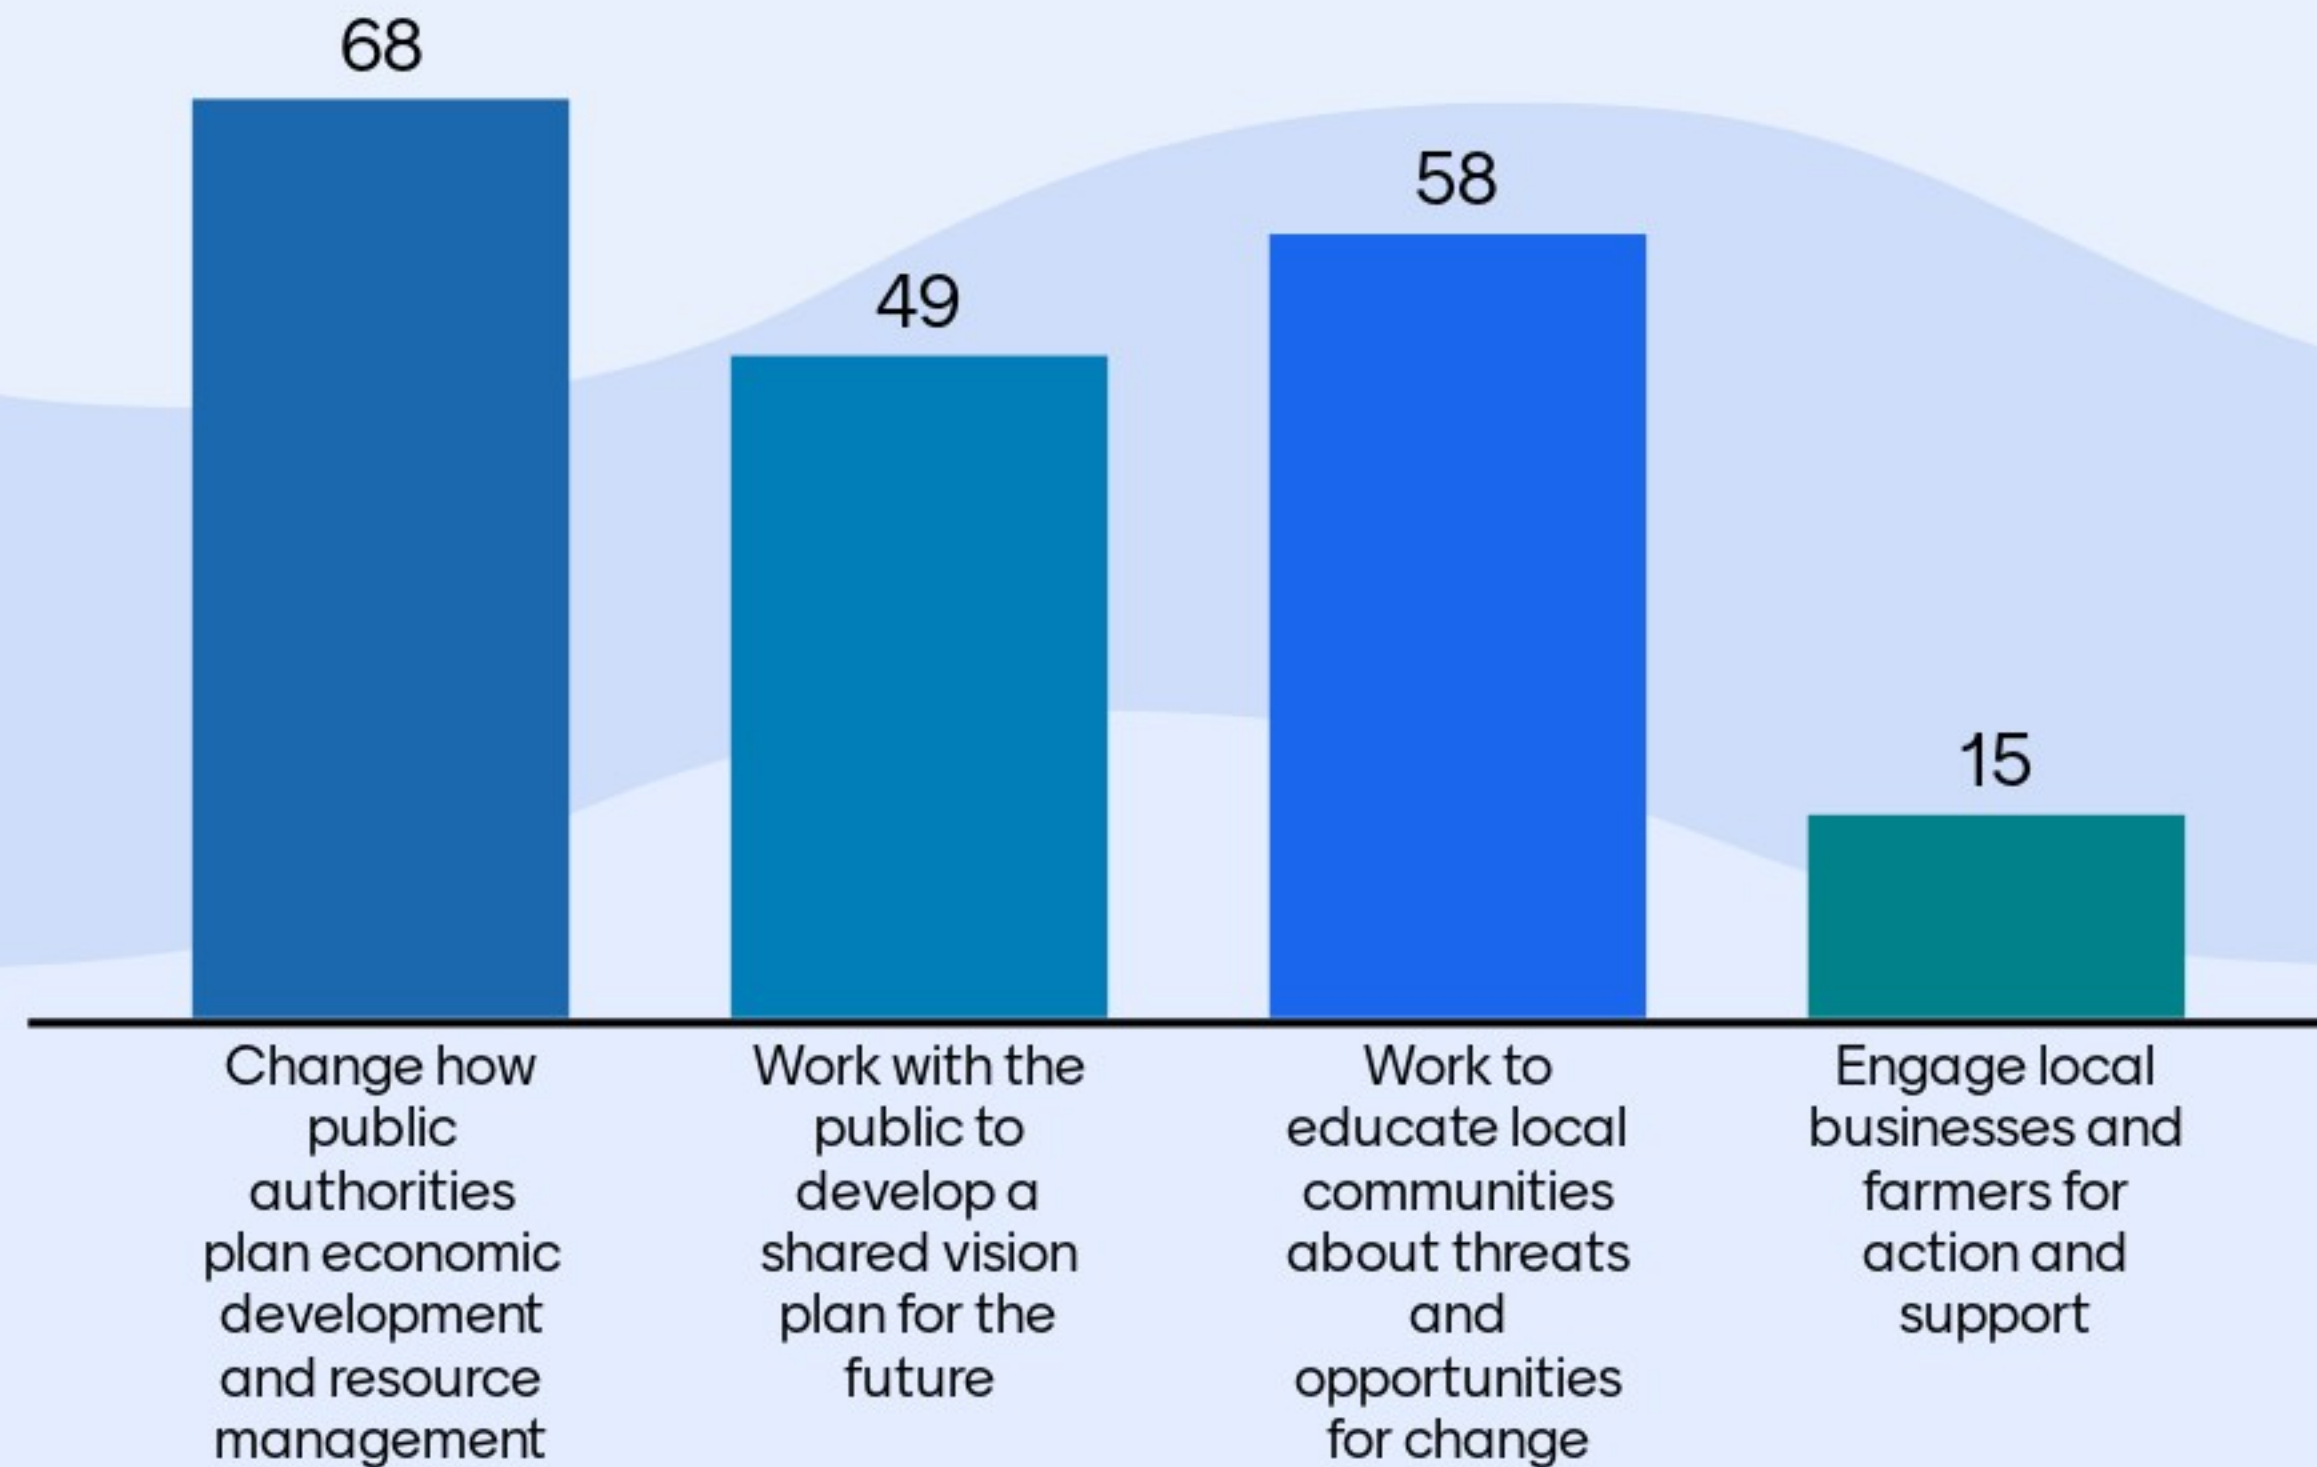

# To address climate change and other resource needs, which strategy do you think is most needed or effective?

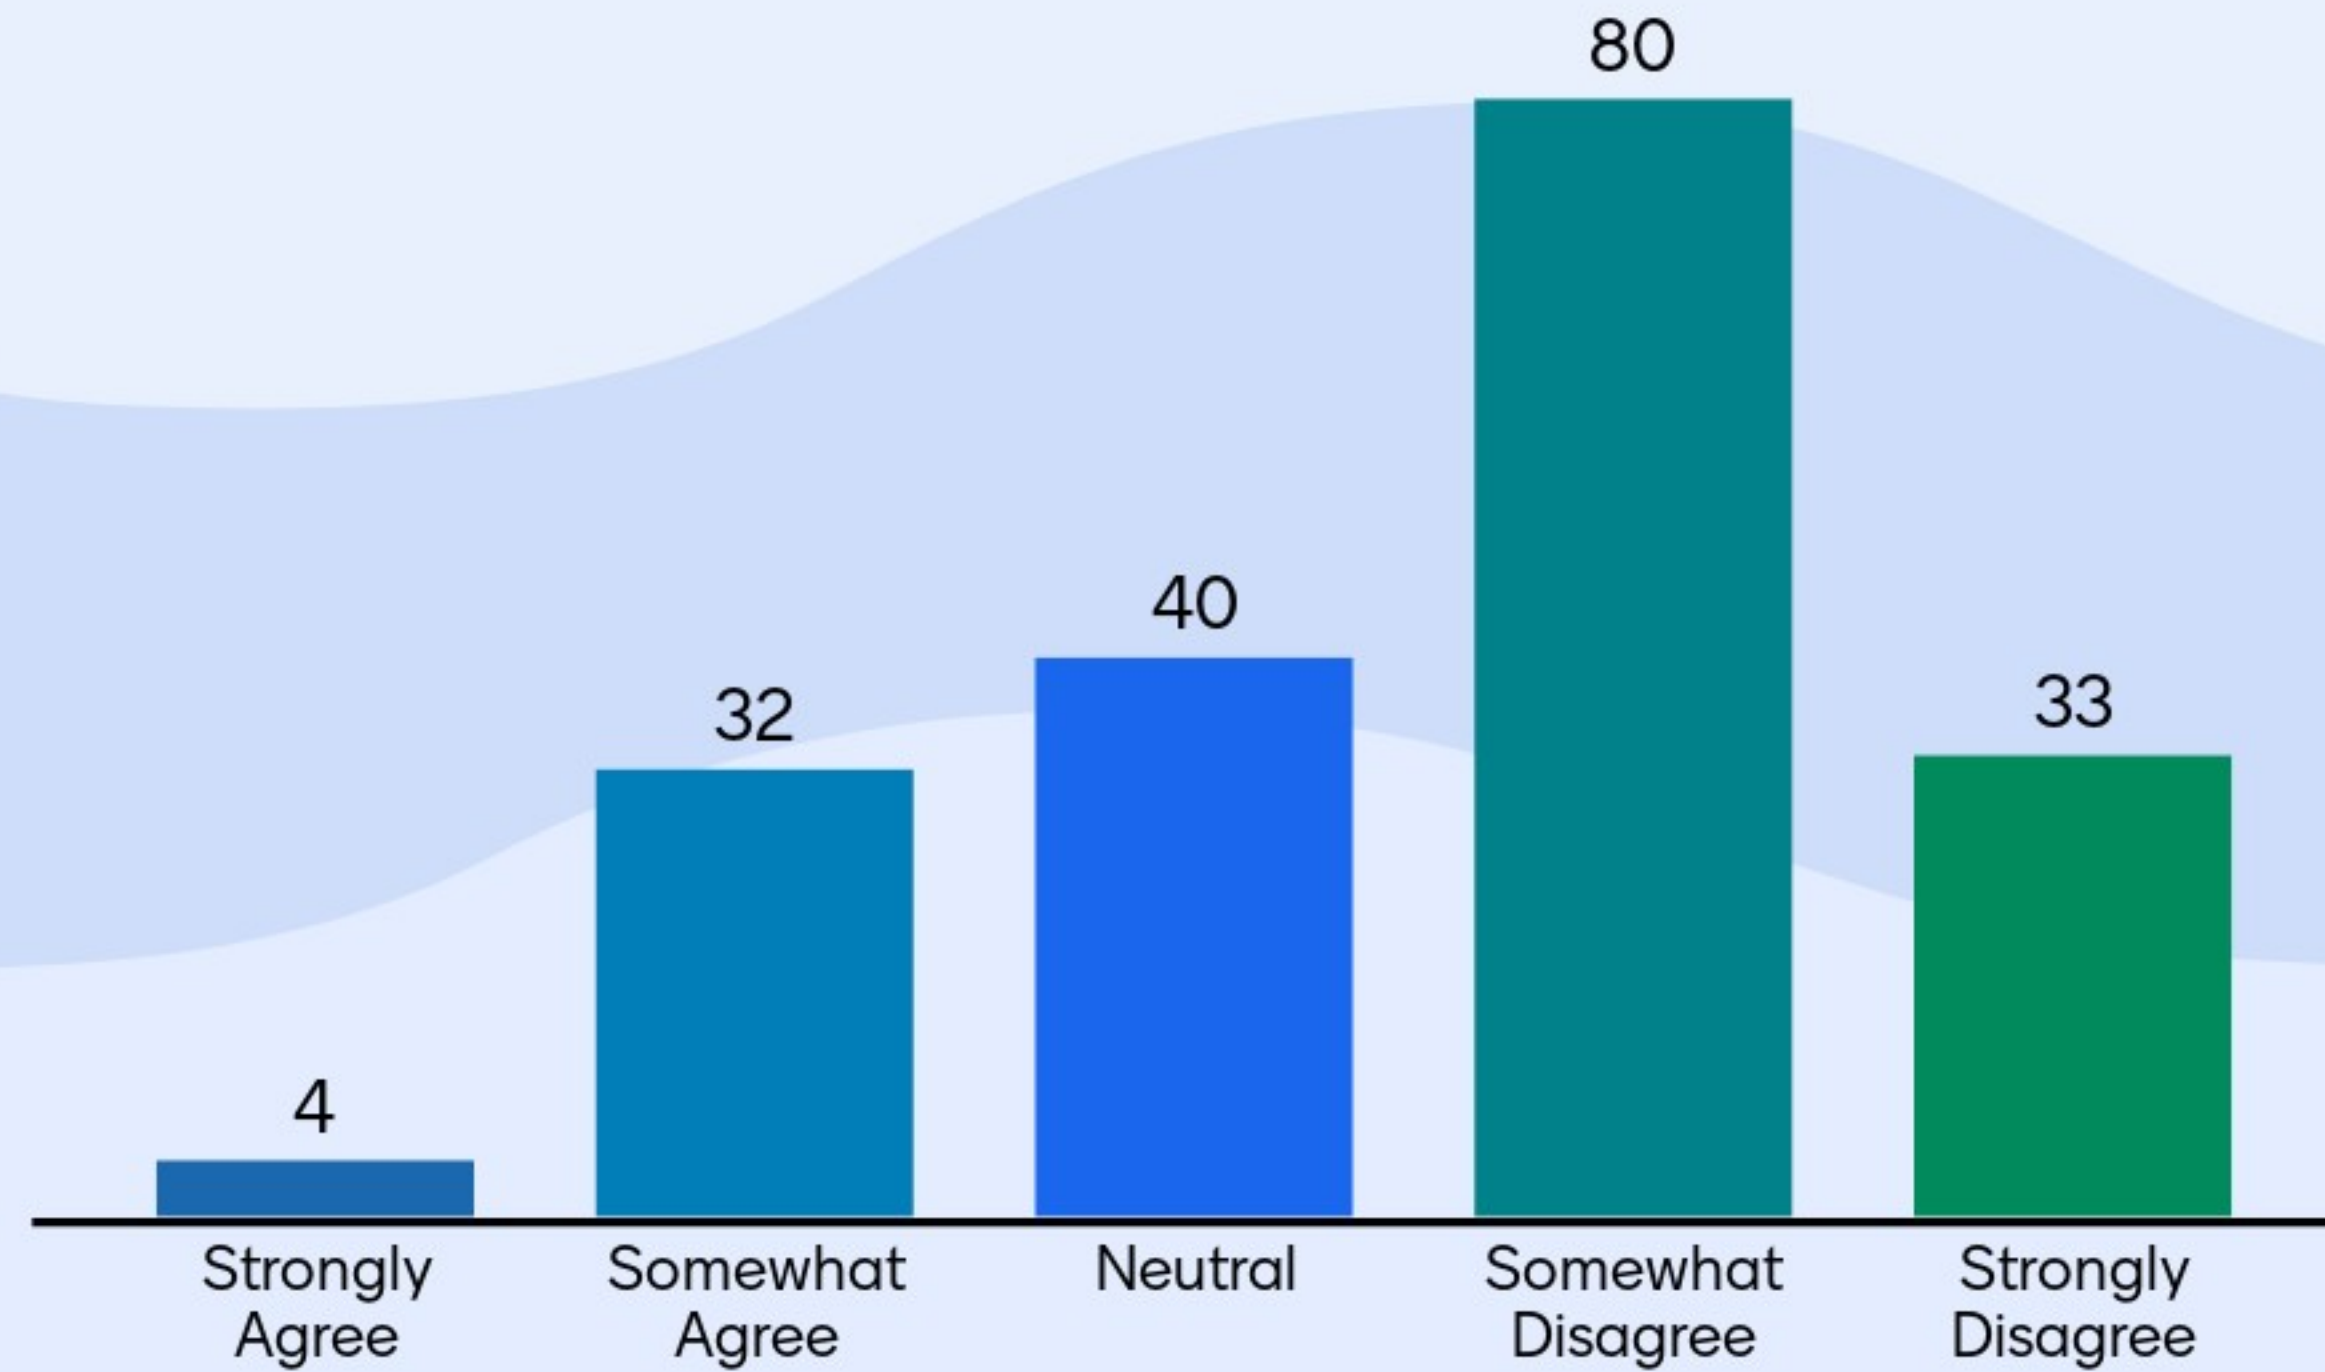

# How should we best integrate climate change concerns into this region?

# Our region is a leader in addressing climate change by effectively preparing for the future.

Thank you for participating in the poll.
